

Rektangel og kvadrat

$O = \text{Omkreds}$

$A = \text{Areal}$

$a, b = \text{sider}$

$d = \text{diagonal}$

Side a og b

$$a = \frac{\text{Areal}}{b}$$

$$a = \sqrt{d^2 - b^2}$$

$$a = \frac{O - (2 \cdot b)}{2}$$

$$b = \frac{\text{Areal}}{a}$$

$$b = \sqrt{d^2 - a^2}$$

$$b = \frac{O - (2 \cdot a)}{2}$$

Diagonal

$$d = \sqrt{a^2 + b^2}$$

Omkreds og Areal

$$O = 2a + 2b$$

$$A = a \cdot b$$
